

SOF SUPPORT · SINCE 2017

WARRIORHEALTH FOUNDATION

A national 501(c)(3) restoring the physical and cognitive health of Special Operations veterans of the Global War on Terrorism.

OUR MISSION

Special Operations Forces gave everything the mission asked of them. Our mission, in return, is to mitigate the effects of Operator Syndrome caused by repeated blast exposure and years of operational tempo.

THE NEED IS CLEAR. AND URGENT.

17,000+

Active SOF operators nationwide

~75%

Estimated to be affected by Operator Syndrome

10–15

Average combat deployments, per career

OUR CLINICAL MODEL – ASSESS. OPTIMIZE. SUSTAIN.

Not a wellness program – precision, integrative, physician-led medicine built for the biological toll of combat.

01

Assess

Advanced diagnostics across neuroendocrine, inflammatory, and metabolic panels to find root causes.

02

Optimize

Fully individualized protocols built around one Operator's injury history, biology, and goals.

03

Sustain

Ongoing physician oversight and regular labs – long-term results, not a one-time handoff.

"The military medical system is made to keep you in the fight. It fails when the day comes to transition to civilian life." — Command Master Chief (SEAL), U.S. Navy (Ret.), 30 years in Special Operations

Sean Rosario - President

47

States where Warriors receive care today, made possible by donors and partners.

"My wife actually enjoys spending time with me once again."

— U.S. Army Ranger & SMU Operator, in active protocol

PARTNER WITH US

We welcome foundation partners who share our commitment to the men and women of Special Operations.

Tanner Steed

Director of Development
